

kanso MCTfiber (30 x 13.3 g pouches)

7.2:1

Definition and Indication: FOOD FOR SPECIAL MEDICAL PURPOSES.

For the dietary management of intractable epilepsy in a ketogenic diet, glucose transporter type 1 deficiency syndrome and pyruvate dehydrogenase deficiency and fat maldigestion and fat malabsorption, oxidation disorders of long chain fatty acids or other conditions requiring a source of MCT fats. Neutral tasting powder containing a mixture of medium chain triglycerides (MCT).

Ingredients:

Medium chain triglyceride 75% (from palm and coconut fat in varying proportions), soluble maize fibre, sodium caseinate (milk), anticaking agent: silicon dioxide; emulsifier: sodium tripolyphosphate.

Important notice:

Must only be used under medical supervision. Suitable from 3 years of age and onwards. Not for parenteral use. Not to be used by individuals who do not have the specified disease. Not suitable as a sole source of nutrition.

Dosage:

To be determined by the clinician or ketogenic dietitian and is dependent on the age, body weight and medical condition of the patient. MCTfiber should be introduced slowly into the diet as rapid absorption of large intakes may cause vomiting or diarrhoea.

Contraindications:

MCTfiber should not be used if ketoacidosis/acidosis, decompensated liver cirrhosis, chronic kidney disease is suspected or in people with medium chain acyl-CoA dehydrogenase deficiency (MCADD).

Preparation:

Add MCTfiber to the desired food or drink, stir until the powder is dissolved. Standard dilution: The suggested feed concentration is 30 ml of water plus a 13.3 g sachet.

Storage:

- Unopened: Store in a cool, dry place.
- Opened: Sachets are designed for single use and should be used once opened. Any unused powder in an open sachet should be kept in an airtight container or sealed with a clipper and used within 24 hours.
